# **EHG-250NC** Horizontal Grinding System

Our Hyprez<sup>®</sup> EHG-250NC Horizontal Grinding Machine is designed to grind advanced materials, such as sapphire, aluminum nitride and garnet. It is also capable of performing wafer back side grinding operations and achieving a high degree of flatness, as well as high quality surface finishes.

The Model EHG-250NC is designed for use with Engis diamond wheels, which reduce processing times and overall costs.

Engis is able to deliver a complete finishing system to fit each customer's unique requirements and optimize the most demanding applications.
